

ACES

ADVERSE CHILDHOOD EXPERIENCES

KINGS COUNTY RESOURCES

WHAT ARE ACES?

Adverse Childhood Experiences, or **ACEs**, are traumatic events that happen when you're a kid. These experiences can develop into Toxic Stress which can have physical and mental effects on the body. Recognizing Toxic Stress can help break the cycle and promote children to grow up strong and healthy.

ACES IN KINGS COUNTY

You don't have to look too far to see the impact of ACEs on Kings County. Check out Youtube and Kings Partnership for Prosperity (KPPF). You can also visit the [211 website](#)

ONLINE TRAININGS

ACEs are important to consider when we discuss the health and wellbeing of our children. Taking the time to learn how you can utilize these types of screenings in your work can make a huge difference.

TAKE THE ACES QUIZ

Learning your Adverse Childhood Experiences (ACEs) score can help you understand the impact of childhood experiences on adult life. A high score does not determine a negative outcome, and with the right support, anyone can overcome ACEs and lead a happy, healthy life. Seeking help from a therapist or support group can be a great first step towards healing.

TOOLKITS AND OTHER RESOURCES

ACEs resources can be found through many organizations. Toolkits for screening, education, and implementation are available for free.
